About the Standards

In 1996, the New Jersey State Board of Education adopted the state's first set of academic standards called the Core Curriculum content Standards. The standards describe what students should know and be able to do upon completion of a thirteen-year public school education. Over the last twenty years, New Jersey's academic standards have laid the foundation for local district curricula that are used by teachers in their daily lesson plans.

At ACIT, curricula are fluid and are revised as needed to meet both student and industry needs. In general, the standards provide local school districts with clear and specific benchmarks for student achievement in specific content areas. Developed and reviewed by panels of teachers, administrators, parents, students and representatives from higher education, business, the standards define a "Thorough and Efficient Education" as guaranteed in 1875 by the New Jersey Constitution. Currently the standards are designed to prepare our students for college and career readiness by emphasizing high-level skills needed for tomorrow's world.

The New Jersey Student Learning Standards applicable to ACIT include 9-12 standards for the following content areas: 21st Century Life and Careers, Comprehensive Health and Physical Education, English Language Arts, Mathematics, Science, Social Studies, Technology, Visual and Performing Arts, World Languages.
